

What is the Resistance Network?

We are mobilizing for bold, collective action to protect human rights and expand freedoms for all:

- Strengthening protections for people in migration through legal advocacy, mutual aid, and sanctuary networks.
- Ensuring rights for trans and gender-diverse people with access to healthcare, legal protections, and safe spaces.
- Expanding civil society's power to organize against authoritarian restrictions.
- Defending international human rights institutions from U.S. government interference and defunding.
- Advancing climate justice by resisting policies that fuel environmental harm and displacement.
